

126PCS

The image displays 126 pieces of the 'My Little Pony' 3D puzzle, arranged in two rows. The top row shows various geometric shapes like squares, triangles, and rectangles in different colors (pink, purple, grey). The bottom row shows more complex shapes, including some with patterns and others that are solid colors. Each piece is labeled with a quantity (e.g., X4, X2, X7) indicating how many of that piece are included in the set.

126PCS

The pieces are arranged in three rows:

- Row 1:** 8 pieces (X4, X4, X4, X2, X7, X7, X2, X2)
- Row 2:** 10 pieces (X2, X2, X2, X2, X2, X2, X2, X2, X2, X2)
- Row 3:** 18 pieces (X1, X1, X1, X3, X3, X2, X2, X2, X2, X2, X2, X2, X2, X2, X2, X2, X2, X2)

The shapes include various polygons, patterns, and icons, all designed to fit together to form a 3D structure.

The image displays four distinct geometric figures, each constructed from a set of triangles and squares. The shapes are composed of red and purple faces, with some faces having black outlines. The shapes are arranged in a 2x2 grid, separated by thin vertical lines. Each shape has a unique arrangement of faces, with some shapes having a central square face and others having a central triangle face. The shapes are labeled with numbers 1 through 4, indicating their position in the grid.

The image displays four distinct configurations of two transparent red toy vehicles (a truck and a car) joined together using interlocking plastic connectors. The vehicles are shown in various orientations and combinations, demonstrating their versatility. The top-left configuration shows the truck and car joined side-by-side. The top-right configuration shows the truck and car joined front-to-back. The bottom-left configuration shows the truck and car joined side-by-side in a different orientation. The bottom-right configuration shows the truck and car joined front-to-back in a different orientation. The vehicles are made of transparent red plastic and have black wheels. The connectors are black and white plastic pieces that fit into slots on the vehicles.

The connectors are black and white plastic pieces that fit into slots on the vehicles.

The image displays four distinct configurations of a 'Princess Castle' toy, constructed from translucent pink plastic blocks. Each configuration includes a unicorn and a princess figure. The top-left assembly features a tall central tower with a white balcony and a small white unicorn. The top-right assembly shows a more compact structure with a princess figure inside. The bottom-left assembly has a princess figure on the left and a small white unicorn. The bottom-right assembly is a larger, more complex structure with a princess figure and a small white unicorn. The blocks are connected by small white pins, and the entire set is presented on a white background.

The image displays four different ways to assemble a magnetic building block castle. Each castle is constructed from pink and purple blocks and includes a white rabbit, a girl figure, and a unicorn figure. The configurations are as follows:

- Top Left:** A castle with a central tower featuring a moon and stars. It has a ramp on the left and a girl figure in a room on the right.
- Top Right:** A castle with a central tower featuring a moon and stars. It has a ramp on the left and a girl figure in a room on the right.
- Bottom Left:** A castle with a central tower featuring a moon and stars. It has a ramp on the left and a girl figure in a room on the right.
- Bottom Right:** A castle with a central tower featuring a moon and stars. It has a ramp on the left and a girl figure in a room on the right.

- Bottom Right:** A castle with a central tower featuring a moon and stars. It has a ramp on the left and a girl figure in a room on the right.

The image displays two different configurations of a magnetic building block set. The blocks are primarily pink and purple, with some white and black accents. The top configuration shows a castle with a unicorn on top, a princess on a slide, a rabbit, and a prince. The bottom configuration shows a more complete castle structure with a princess on a slide, a rabbit, a prince, and a princess.

The image displays two different configurations of a pink and purple magnetic building block set. The top configuration shows a castle with a unicorn on top, a princess on a slide, and a knight. The bottom configuration shows a more complete castle with a princess on a slide, a knight, and a princess standing in front.
